

HELIA[®]

HELMED LINE IMMUNOASSAY ANALYZER

Optimized Automation for LIFE & HEALTH

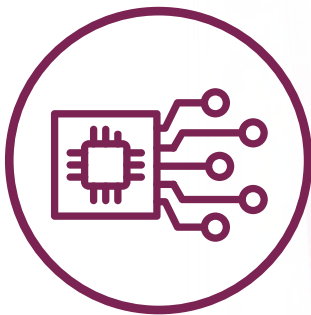

More than just analysis. HELIA.

Improved maintenance processes

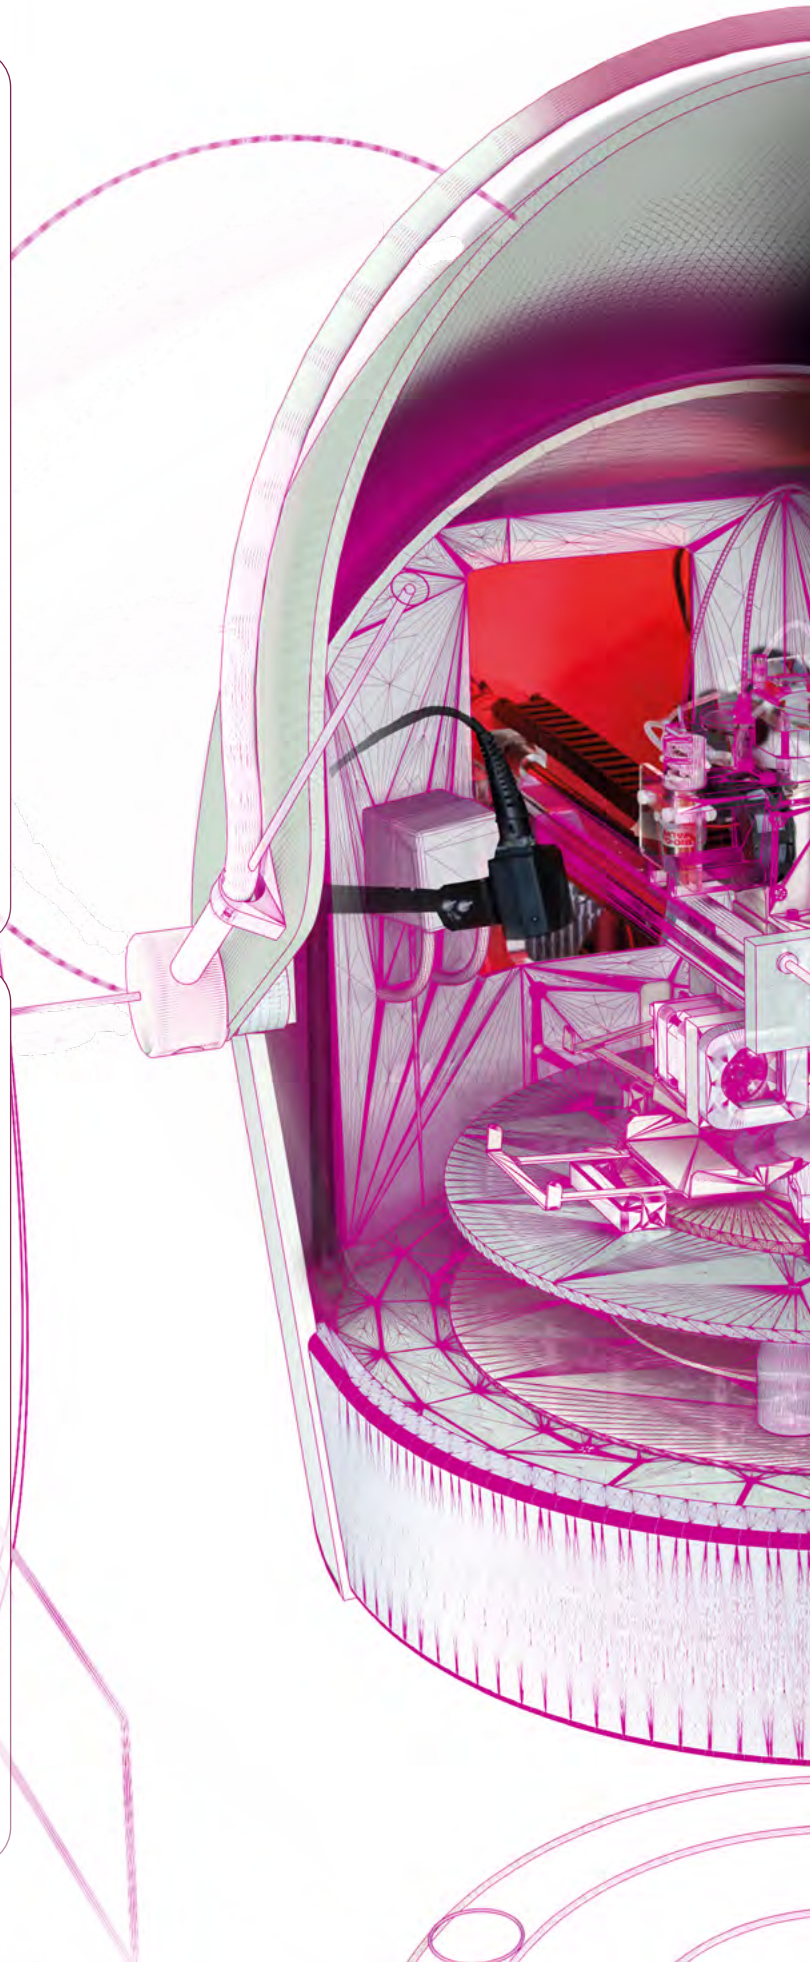

Process optimization ensures greater efficiency and satisfied employees. Simplified processes create more room for customer care – for smoother operations and greater satisfaction.

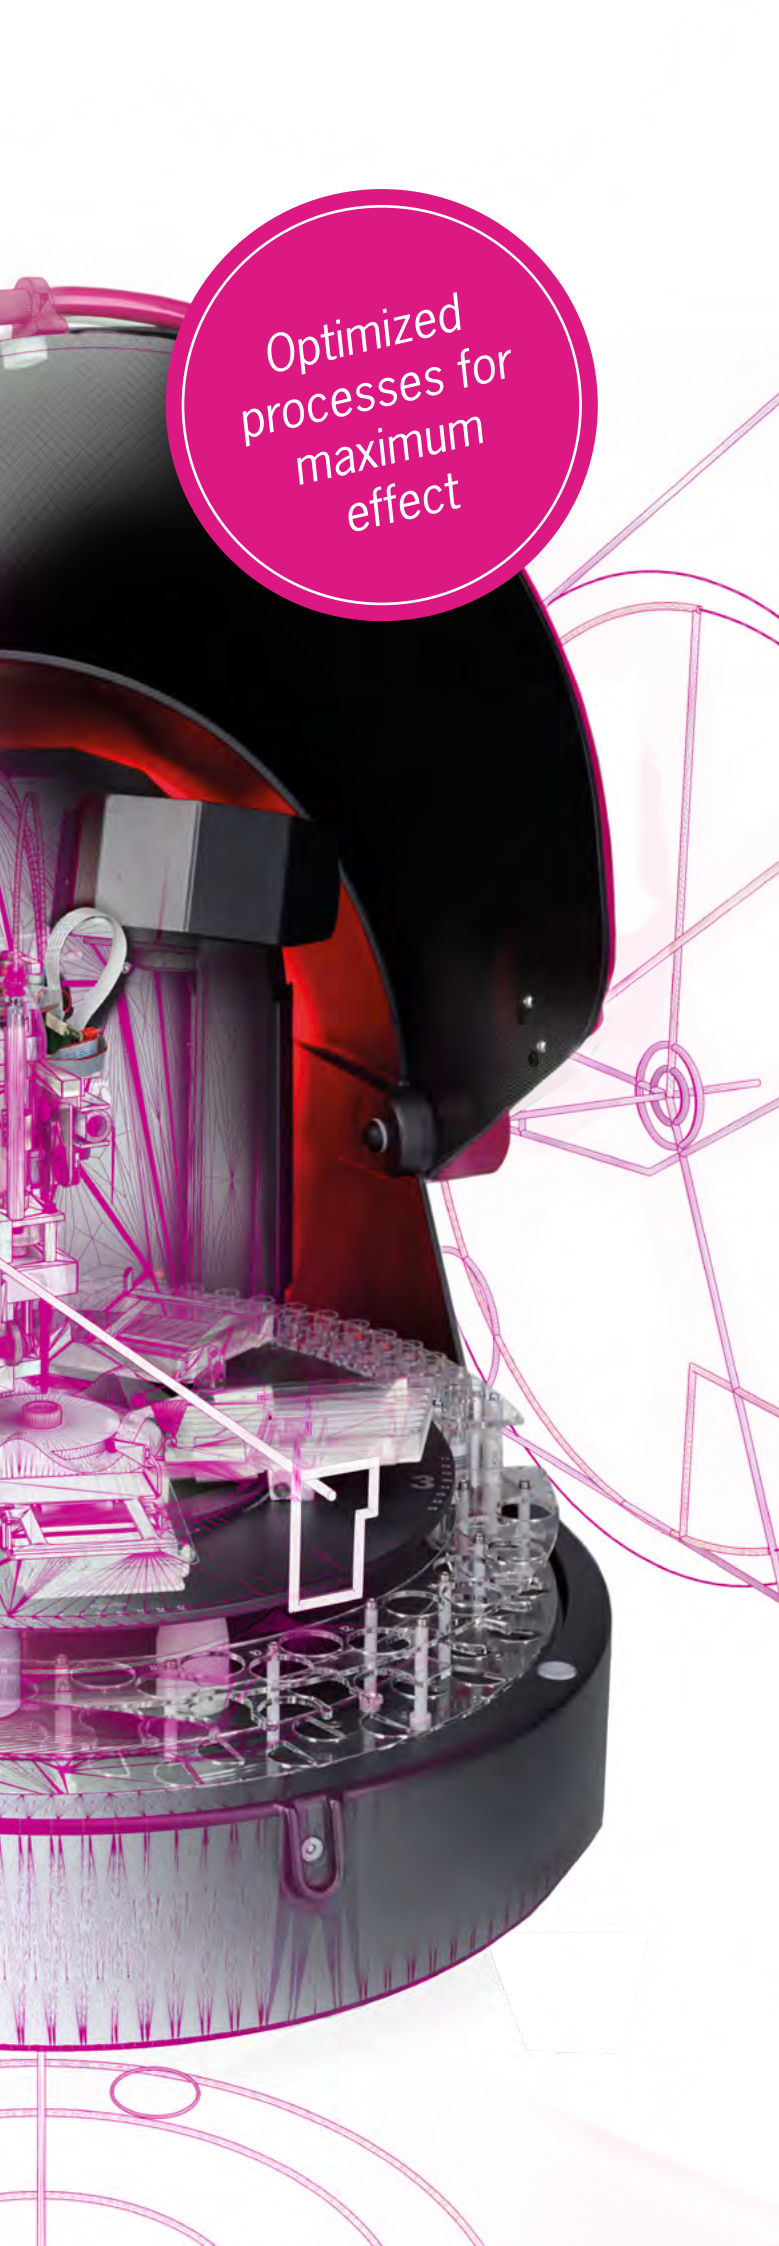

Increase your team's motivation and experience the difference!

Information pop-ups and supporting software

The new **HELIA** offers tangible support for your team. Thanks to additional information pop-ups, your employees always receive the information and tips they need to work more efficiently. Integrated mechanisms support their work processes and enable manual intervention, if necessary, which helps to minimize delays in the daily routine.

Improved evaluation algorithms for more precise data

The improved evaluation algorithms of the **HELIA D3** software provide more precise data and thus increased comparability. It is this accuracy that leads to better diagnoses and faster treatment.

Your laboratories will benefit from this innovation: More satisfied customers and more efficient workflows increase the productivity and reputation of your laboratory.

Part of a network with a broad product portfolio

HELIA offers a fully automated platform for LIA analysis – across a wide range of areas and sample types.

Embedded in a strong analytical network, **HELIA** perfectly complements your LIA-based laboratory – for maximum efficiency and reliable results.
